Project: UP Energy Improved Cookstoves

110 tonnes
CO₂e

2022

Uganda

It is hereby certified that Swedavia AB has carbon offset 110 tonnes of carbon dioxide equivalents, for Umeå Airport.

The CPA is located in the Republic of Uganda and involves distribution of efficient biomass fired Improved Cookstoves (ICS). The project ICS replaces the low efficiency, traditional biomass fired stoves, used for meeting similar thermal energy needs in the baseline.

Other positive aspects

Reduced demand for firewood and charcoal which lower the pressure on surrounding forests and woodlands. Less time spent on collecting combustionable material and costs of buying. Less pressure on the ecosystem, illegal timebring, biodiversity and watersheds.
